Leave the heavy lifting to us!

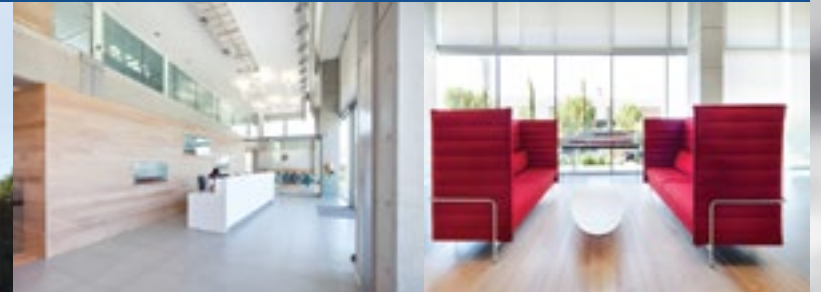

FAMELINE
HOLDING GROUP

The Group

The **Fameline Holding Group** is comprised of **50 companies** which have primarily been **active in the Shipping Industry for the last 30 years**. The main focus of Fameline Holding Group covers a wide range of supplies and services, having its headquarters located in Limassol.

FHG maintains offices - and possesses within its embrace a network of local representatives and sales agents - in **Piraeus, Hamburg, Dubai, Abu Dhabi, Singapore, Shanghai, Rotterdam, Groningen** and **Monaco**.

A total number of **450 employees** are currently employed in Cyprus & Overseas.

FL Crane & Deck Services

The company is dedicated to the business, having large overseas clients (ship owners/ship managers) of the **MIE Group**.

FL Crane & Deck Services is supported by the sales and operations of each individual company under the Fameline group.

The exclusive use of the principals of the Fameline Group, which are in the majority of the cases the Genuine & OEM makers, and the use of own service engineers guarantee:

- (a) high-quality spare parts
- (b) transparency for the origin of spares

**For every quote
for equipment
& spares,
the following
terminology
is used:**

GENUINE/OEM - Original Equipment Manufacturer

- The supplier of the assembled machine to the ship (genuine spares)
- The supplier of a self-contained sub-component to the Primary OEM

OPM - Original Parts Manufacturer

A company which supplies components or minor sub-components to one of the above, and the source can be traced

EPM - Equivalent Parts Manufacturer

A company which manufactures equivalent sub-components or parts (to those used by the OEM), but are not custom made for the OEM.

In addition:

- a) they fully perform an equivalent task
- b) they are made to comply with ISO (or national equivalent) standards

Crane&Deck
Services Limited

Our Stocks

Keeping many spares on stock, located in our warehouse in China, is one of our policies – despite today's common practice.

This policy enables us to be quick and effective suppliers.

Locations Around the World

Worldwide at Your Service

We are equipped with all the knowledge to cover all your service requirements for all brands of cranes and for most other hydraulic and mechanical equipment on your vessels. We are also able to deliver most of the spare parts for your cranes.

● OWN OFFICES & SERVICE STATIONS

- Singapore
- China/Shanghai
- Europe

Crane&Deck
Services Limited

Workshop Service

Skilled Manpower

An important addition to spares' supply and worldwide service is our own workshop which covers overhaul of hydraulic components, gearboxes, valves, electrics and many others.

Our experienced workshop engineers are used to handling possible challenges coming up in our quick moving business.

Crane Service

Troubleshooting & Emergency Service

We provide specialized service and repair for deck cranes. Our skilled engineers are mostly factory-trained and able to attend on your vessels worldwide.

Our 24/7 hotline is always available to support you and your crew. Many problems can be solved by either calling or e-mailing us; engineers from several places of the world are always on duty, available to travel to your vessels for immediate attendance.

Inspection & Prevention

Annual inspections and regular rocking tests of your cranes give a clear status about the condition.

Following our inspection protocol (check list) we will provide you with our recommendation about service work and spare parts and we stress the important steps to be followed as soon as possible, as well as what can wait until the next docking.

This will give you a valuable tool for budget planning and it will make sure, that your cranes are always operation-ready.

Annual inspections will avoid or reduce off hire cost.

Planned Service / Maintenance

Based on a pre-docking inspection, maintenance during dry-docking can be planned. All parts and tools can be shipped in advance at low cost...Our engineers will take over the work or the supervising of the work for your cranes.

Adjustments of limits and overload test as well as discussions with class surveyors is also part of our duties.

If required, we can organize the complete scope of work including welding, flushing of pins with oxygen lance as well as rework of flanges for slewing bearing installation – on spot worldwide.

Procedures in Service On Board

Crane Service

Pre-docking Inspection

Based on specific work-scope standards, and after inspecting the condition of equipment, we discuss with the SM on service about the project and plan the job to be completed ahead. A detailed inspection report illustrated by visualized photos will be presented with descriptions of subjects, a repair proposal and a recommendation list with spare parts supply.

Customized Planning

After a thorough pre-docking Inspection, with our professional experience on deck machinery, we will provide you with a plan outlining suggestions the docking maintenance, fixing working scopes and spares supplies. Observing efficient and effective principles, our customized service complies with your requirement and reasonable budget.

Spare Parts Preparation

Upon approval of our suggestive plan and budget, spares and tools are being prepared in schedules. Due to our large warehouse located along main ports and shipyards, spare parts can be promptly delivered on board.

Service on Board

When docking according to the approved scheme, the following scopes will be conducted:

- Supervise for docking repair and quarantine the whole progress for quality
- Restore equipment back to its working condition with our professional knowledge experience
- Deliver the damaged parts to our nearby workshop to overhaul
- Carry out UT and overboard test by our certified engineer if necessary
